

What kind of science is the hardest for you to understand or appreciate?	How did you choose where you went to college?
What does your typical day look like?	Which college class has been the most useful to you in your job?
If you could have a conversation with your high school self, what advice would you give?	What do you love most about your work?
What skills do you think are most important in your current work?	Looking back, would you do anything differently, in terms of your preparation as a scientist?
